Python programs: conditionals, loops, lists and strings

Program 2: Progressive Electricity Billing 2

Program 3: Hospital Billing and Patient Classification 3

Program 4: Employee Payroll and Deduction Analysis 4

Program 7: Retail Billing with Multiple Discount Rules 5

Program 8: Manufacturing Cost and Profitability Analysis 6

Program 9: Multi-Currency Travel Budget Analysis 7

Program 10: Campus Event Financial Planning 9

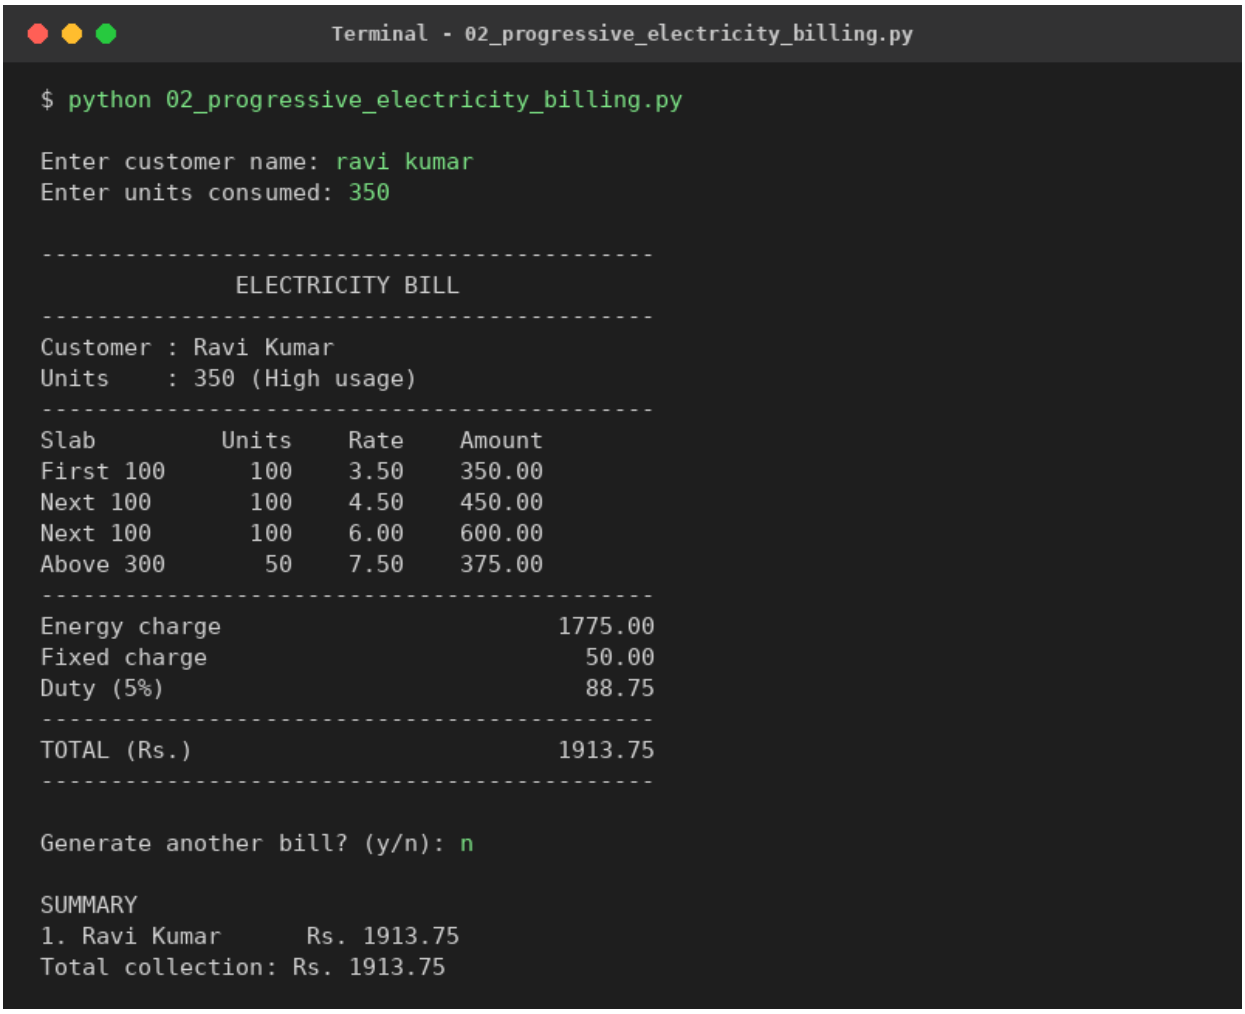

Program 11: Examination Result and Grace-Mark Validation 10

Program 12: Attendance Recovery Computation 11

Program 13: ATM Transaction Sequence Simulation 12

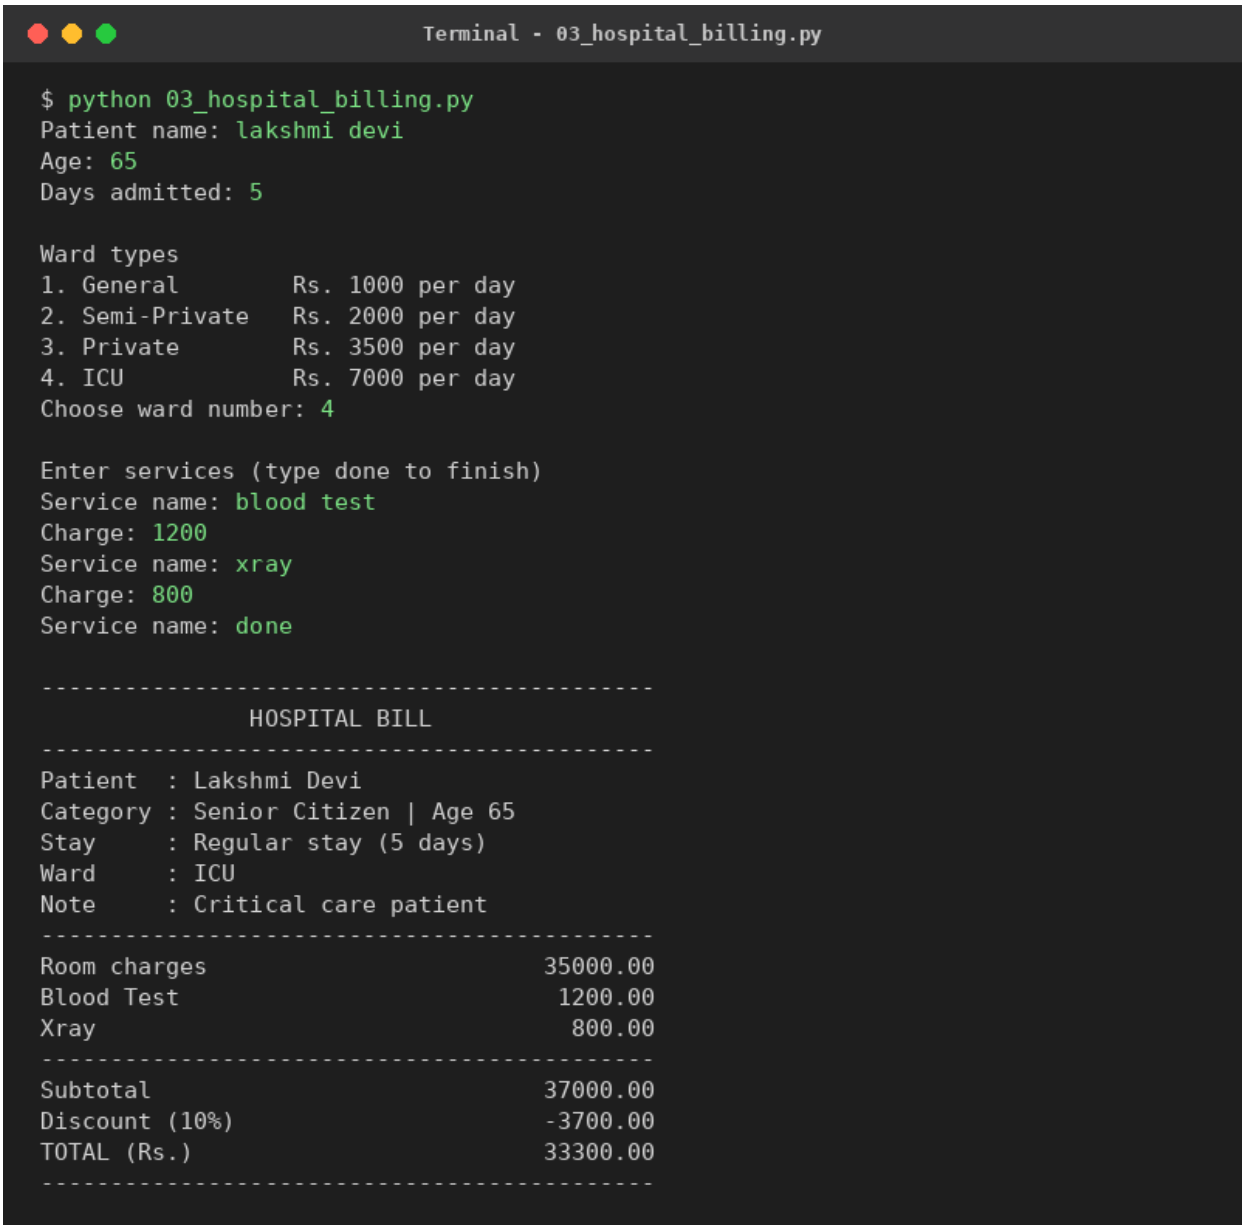

Program 2: Progressive Electricity Billing

Sample run: one customer using 350 units, so all four slabs apply

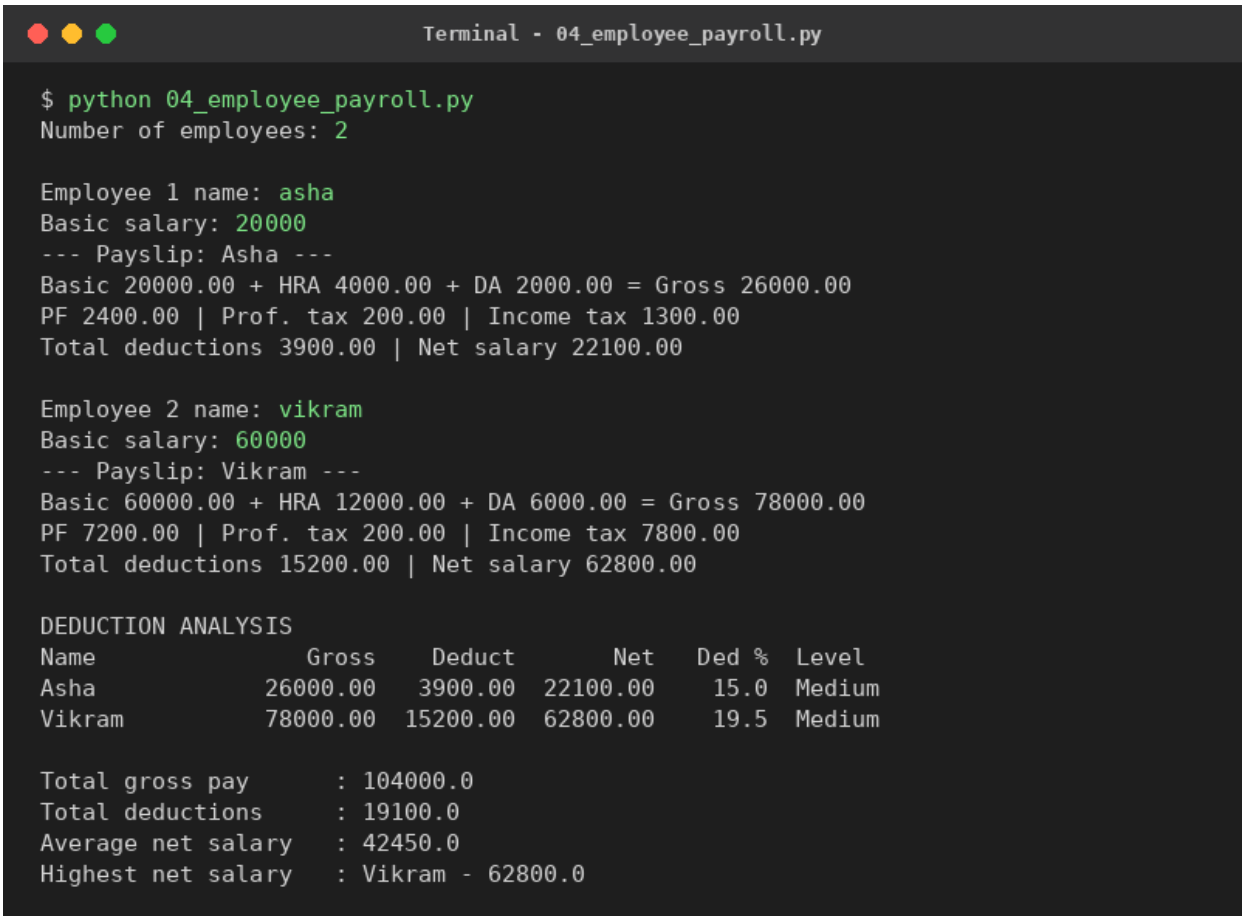

Program 3: Hospital Billing and Patient Classification

Sample run: senior citizen admitted to ICU for 5 days with two extra services

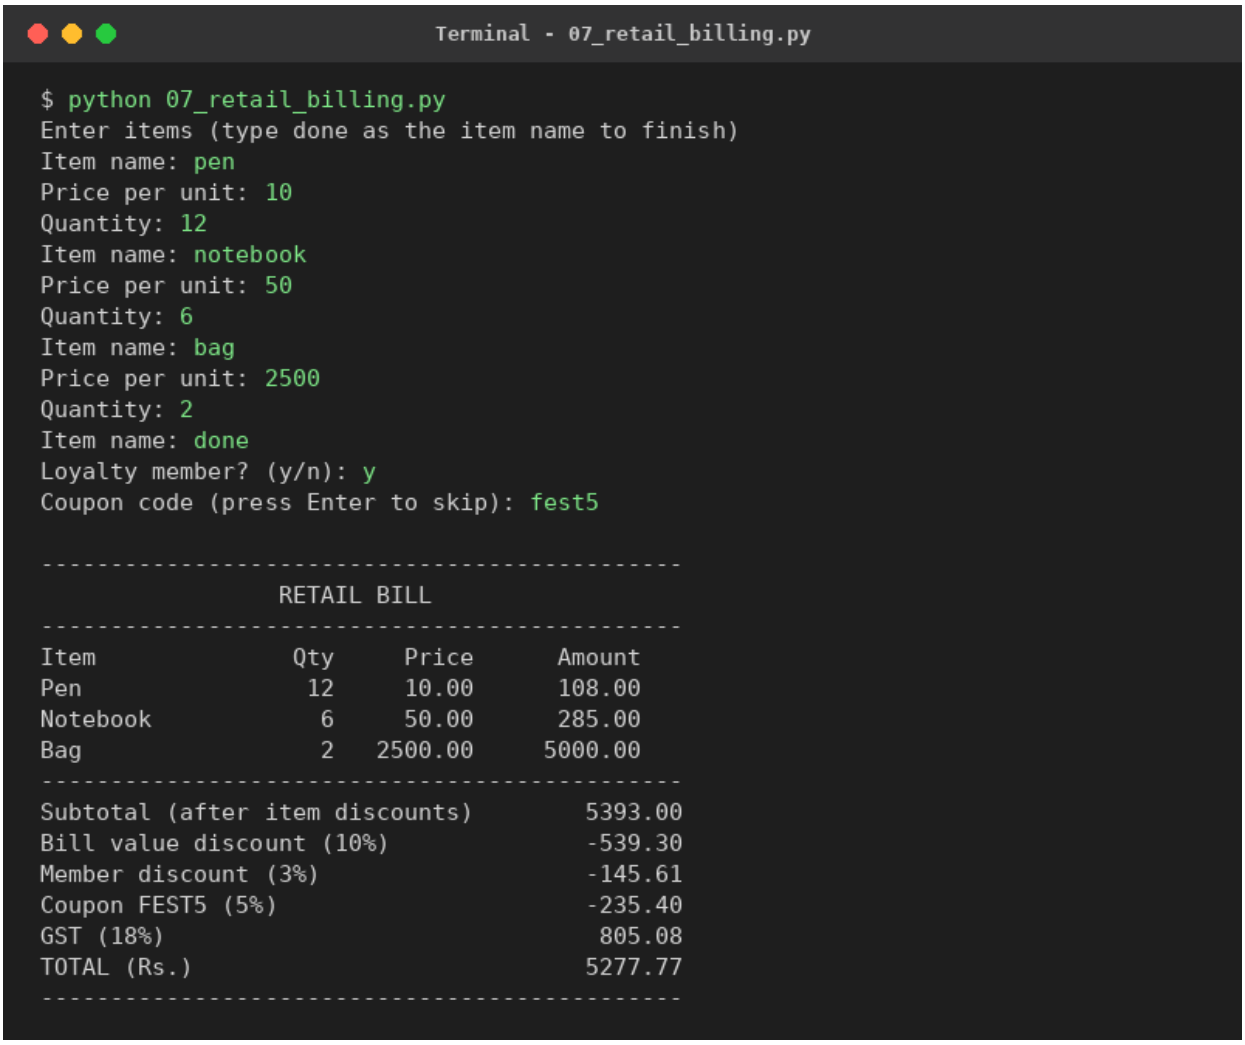

Program 4: Employee Payroll and Deduction Analysis

Sample run: two employees with different salary levels

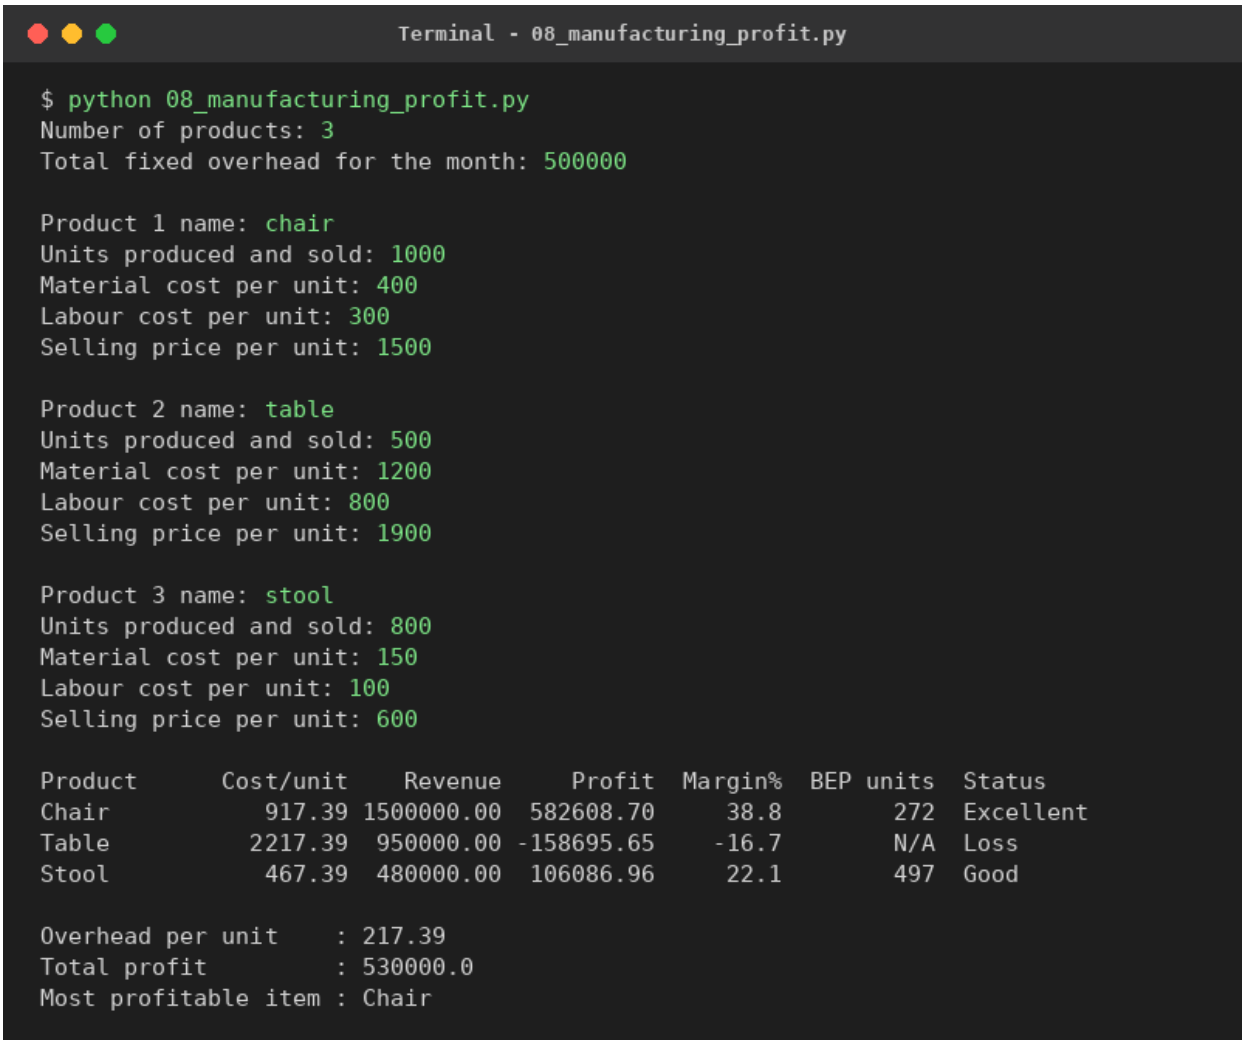

Program 7: Retail Billing with Multiple Discount Rules

Sample run: bulk item discounts, bill-value discount, member discount and coupon FEST5

Program 8: Manufacturing Cost and Profitability Analysis

Sample run: three products showing Excellent, Good and Loss status

Program 9: Multi-Currency Travel Budget Analysis

Sample run 1: 5-day trip in USD, within budget

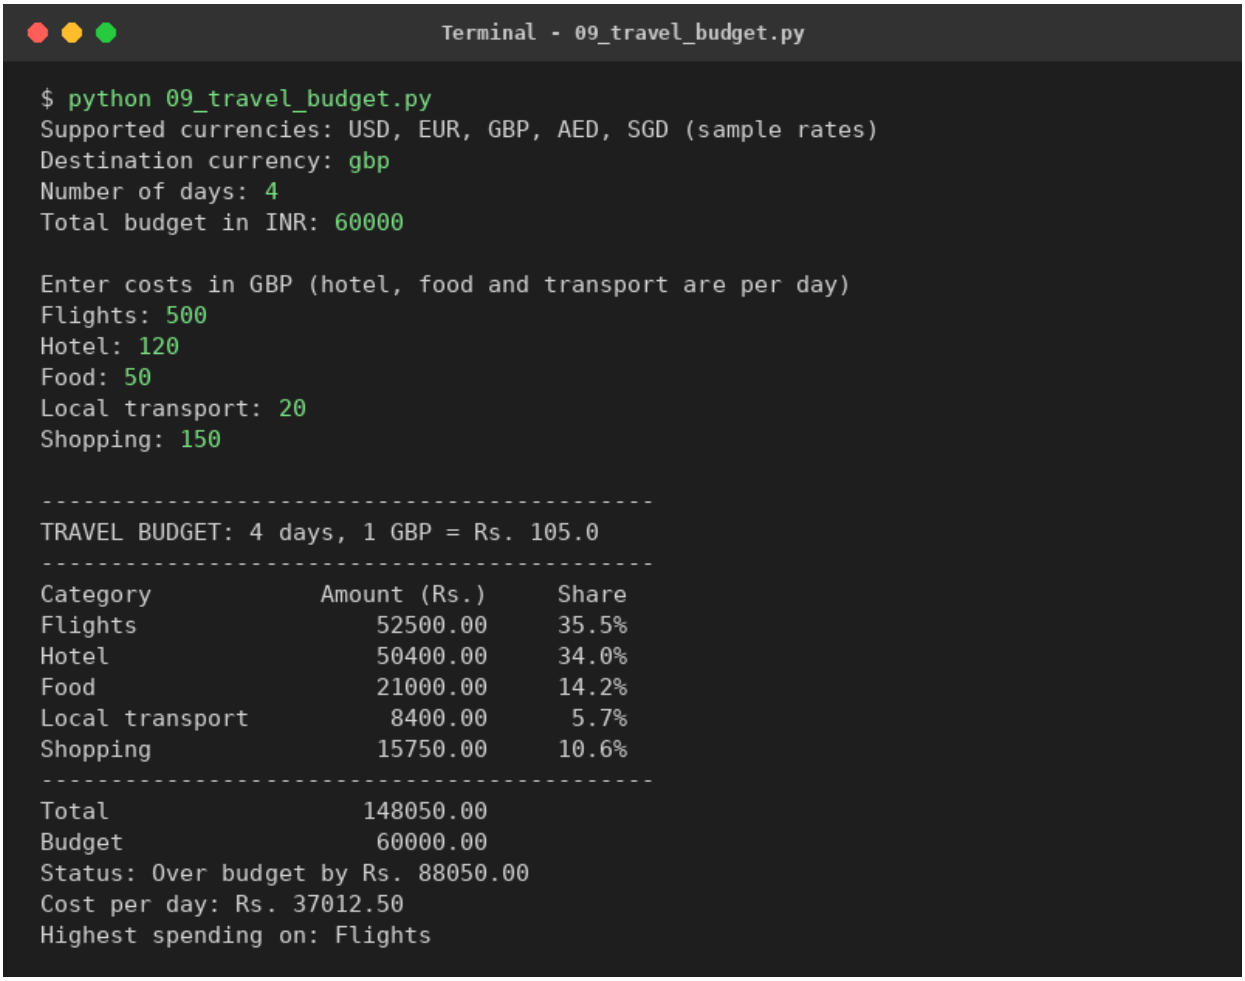

Terminal - 09_travel_budget.py

```
$ python 09_travel_budget.py
Supported currencies: USD, EUR, GBP, AED, SGD (sample rates)
Destination currency: usd
Number of days: 5
Total budget in INR: 150000

Enter costs in USD (hotel, food and transport are per day)
Flights: 600
Hotel: 100
Food: 40
